## ONLY SAWSMITH OFFERS THESE 5 EXCLUSIVE FEATURES

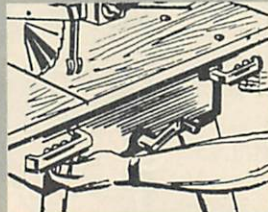

### OUT-FRONT CONTROLS

One hand loosens, locates, locks — simplicity and convenience never before possible!

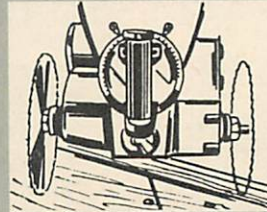

### VARI-SPEED DRIVE

Dial the correct motor speed, from 1700 to 6300 RPM. There are 7 speeds to choose from!

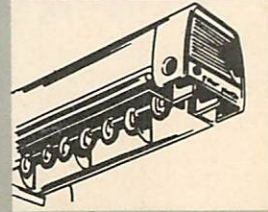

### 1-PC. SLIDING TABLE

Slides fence into position. No more fumbling—locks positively . . . instantly. Adjusts for any cut!

### SWITCH-OVER BLADE

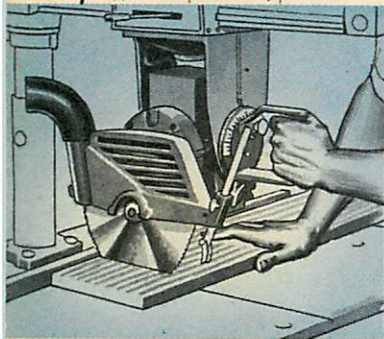

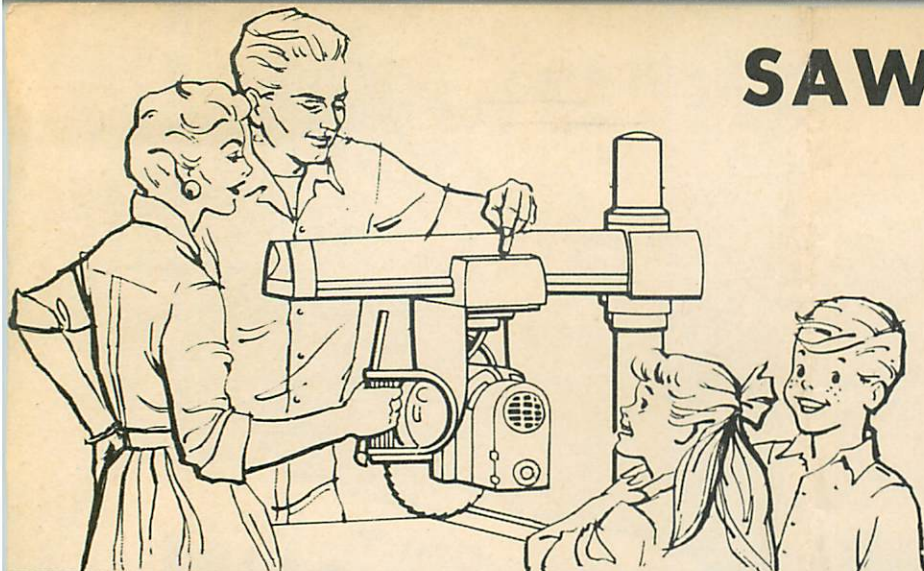

Reversible arbor switches from one spindle to other in seconds. Puts all cuts fully on table!

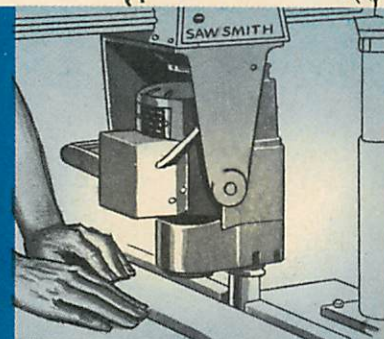

### HIDDEN COIL CORD

Automatically retracting and expanding power cord can't get in your way. You get built-in safety!

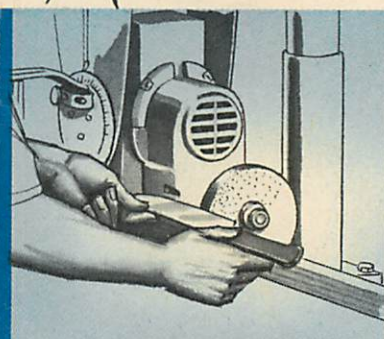

# SAWSMITH makes power tool operations easy for everyone

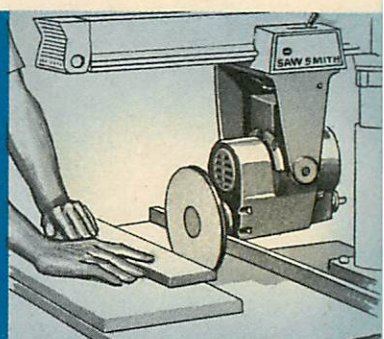

**SAWING** . . . from simple cuts to the most intricate of cuts, Sawsmith gives you power sawing never before possible. Capacity even greater than 10" saws!

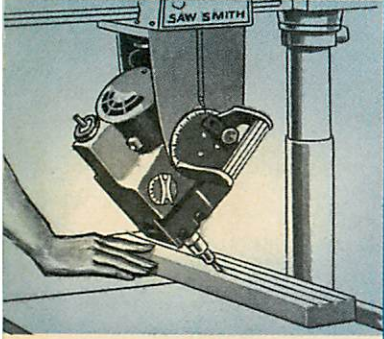

**JOINTING** . . . by using a jointer head (has 2½" capacity), the Sawsmith quickly and easily produces an exacting, perfectly smooth surface for jointing!

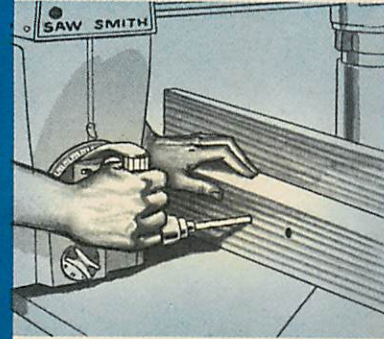

**GRINDING** . . . with variable speeds and twin spindles, Sawsmith makes grinding and related operations easy and simple. Mount any combination of grinding wheels!

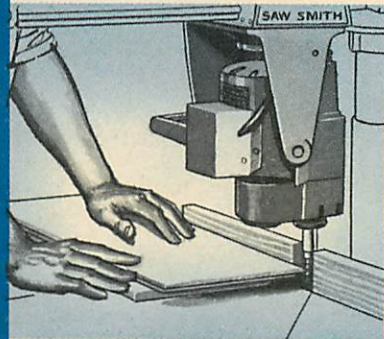

**SANDING** . . . using disc or drum sanders, the spindle and table can be adjusted, the spindle speed varied. Sawsmith gives fast, efficient sanding of any surface!

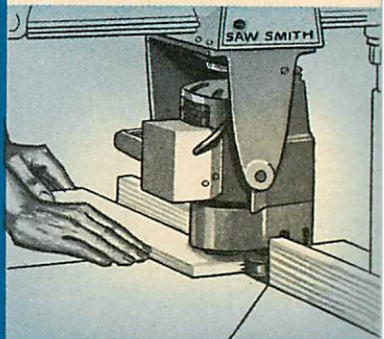

**ROUTING** . . . variable drive gives the right speed for clean-cut routing. Irregular shapes can be cut with ease. Sawsmith delivers the required precision you insist on!

**DRILLING** . . . performing an extensive range of boring, horizontal and vertical drilling operations — Sawsmith delivers both convenience and accuracy!

**SHAPING** . . . the movable table and Vari-Speed drive allow Sawsmith to handle rectangular, circular and irregular forms with an added easiness of operation!

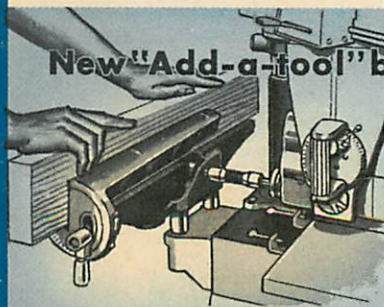

**MOLDING** . . . the molding head gives the Sawsmith unlimited versatility for shaping. Tilting of the spindle affords additional shapes from any set of cutter knives!
